### EDUCATION

George Brown College - Canada

Sep 2023 – Aug 2024

Web Development - Front-End Design Program

George Brown College - Canada

Sep 2022 – Aug 2023

Mobile Application Development and Strategy

Charotar University of Science and Technology - India

Jun 2018 – Apr 2022

Bachelor of Technology in Computer Engineering

#### Experience

Front-End Developer

May 2024 - Sep 2024

B12 Give

Toronto, ON, Canada

- Engineered dynamic web applications using React.js, enhancing page load speed by 20% and achieving optimal Lighthouse performance scores.
- Developed scalable RESTful APIs with Node.js and Express.js, streamlining data exchange and reducing backend load.
- Optimized MongoDB data models and indexing strategies, improving query efficiency and backend performance.

iOS Developer May 2023 – Sep 2023

George Brown College

Toronto, ON, Canada

- Designed and developed the Repairmate iOS app, facilitating car service bookings for over 500 users.
- Integrated GPS-based mechanic search, cost estimation, and secure payment features using Swift and Firebase.
- Implemented RESTful APIs for booking and profile management, reducing server load by optimizing data requests.
- Conducted user testing and iterated based on feedback, enhancing app usability and increasing user retention by 25%.

#### Full Stack Developer

Sep 2022 - Apr 2023

Trionic Technology LLP

 $Vijapur,\ Gujarat,\ India$ 

- Developed responsive, SEO-optimized web applications using HTML, CSS, JavaScript, and Bootstrap, with a Node.js and MySQL backend.
- Implemented secure user authentication, CRUD operations, and role-based access control in a scalable architecture.
- Collaborated with cross-functional teams to deploy applications, reducing production bugs by 30%.
- Integrated Google Analytics and enhanced SEO, boosting organic traffic by 40%.

#### Projects

WealthFlow | Next.js, Tailwind CSS, Node.js, MongoDB, JWT

- Developed a full-stack expense tracker with category-wise logging, expense analytics, and bill expiry reminders.
- Enabled secure user sessions using JWT and bcrypt, ensuring safe, role-based access to user financial data.
- · Visualized spending trends by category, helping users identify overspending and track financial goals.
- Implemented a responsive design to ensure a seamless experience across desktop and mobile devices.

Stock Search | React.js, Tailwind CSS, Node.js, PostgreSQL, JWT

- Created a real-time stock monitoring dashboard with live charts, symbol lookup, and user portfolio management.
- $\bullet \ \, \text{Built a wallet-based buy/sell simulation system with PostgreSQL-backed transaction history and portfolio value updates}.$
- Secured access with JWT authentication and structured PostgreSQL schemas for watchlists and cached market data.
- Optimized API calls to third-party stock data providers to minimize latency and improve user experience.

RepairMate | Swift, Firebase, REST API, Firestore

- Designed and developed an iOS app to manage and track electronic device repairs, statuses, and service logs.
- Integrated Firestore for real-time updates and push notifications for repair status changes and delivery updates.
- Used Firebase Authentication for secure login and role-based access for admins and service engineers.
- Conducted user testing and feedback sessions to continuously improve app usability and reduce user-reported issues.

## TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3, TypeScript, Python, SQL, C++

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Tailwind CSS, Bootstrap, Material-UI, SASS

Tools & Platforms: Git, GitHub, Docker, AWS, Heroku, MongoDB, Postgres, Firebase, WordPress

Testing & APIs: REST API, GraphQL, Postman, Jest, Cypress

AI Tools: ChatGPT, GitHub Copilot, Midjourney, DALL·E, Notion, Cursor, Perplexity
